HORIZONTAL LADDER MODULAR SERIES

#HLAD-MOD

WARRANTY:

Limited 10-year warranty on steel posts, welds, bars and other steel parts on all units that are fully welded, with no moving parts.

PRODUCT SPECIFICATION:

The HLAD Modular Series is constructed using American standard-size structural steel components, including 4" x 4" square tubing with a 1/4" wall thickness for the main posts; 3" x 2", 3" x 1.5", and 2" x 2" square tubing with a 1/8" wall thickness for structural arms, supports, gussets, and spacers; Ø2" round tubing with a .120" wall thickness for outer edges and supports; and Ø1.25" round tubing with a .120" wall thickness for handles and pull-up bars. Construction also incorporates 14" x 14" x 1/2" thick steel base plates, along with 5/16", 1/4", and 1/8" thick steel plate components for brackets, gussets, platforms, rests, and end caps. Connections utilize 1/2"-13 18-8 stainless steel square-neck carriage bolts with tamper-resistant breakaway nuts.

POWDER COATING SPECIFICATION:

Powder coating thickness 6-8 mils. Coatings are tested for 1000 hours of salt spray resistance. Pre-treated, iron phosphate applied, zinc powder applied, functional powder applied, and final TGIC powder coat is applied to provide outstanding weathering capabilities.
